General Competences

 $Taking\ into\ consideration\ the\ general\ competences\ that\ the\ degree-holder\ must\ acquire\ (as\ these\ appear\ in\ the\ Diploma\ acquire\ (as\ these\ appear\ acquire\ (as\ these\ acquire\$

Supplement and appear below), at which of the following does the course aim?

Search for, analysis and synthesis of data and Project planning and management

 $information, with \ the \ use \ of \ the \ necessary \ technology$

Respect for difference and multiculturalism

Adapting to new situations

Working independently

Respect for the natural environment

Decision-making

Showing social, professional and ethical responsibility and

sensitivity to gender issues

Team work Criticism and self-criticism

Working in an international environment Production of free, creative and inductive thinking

Working in an interdisciplinary environment

Production of new research ideas Others...

Working independently

Team work

Criticism and self-criticism

Respect for the natural environment

Production of free, creative and inductive thinking

3. SYLLABUS

Lectures

History and evolution of agriculture. Key-points in the history of agricultural production. Historical review of agricultural science.

Global food production. Global alimentation problems and solutions.

Common agricultural policy in the EU. Past and future challenges.

Global and Greek agricultural production. A: Terrestrial plant production

Global and Greek agricultural production. B:Terrestrial animal production

Global and Greek agricultural production. C: Aquaculture – Plant production

Global and Greek agricultural production. D: Aquaculture – Animal Production

Impact of agricultural production to the environment.

Environmental sustainability and Agricultural production techniques.

The significance of agricultural science in production.

Economic elements of Greek agricultural production.

Needs, perspectives and trends of Greek aquaculture production.

4. TEACHING and LEARNING METHODS - EVALUATION

DELIVERY Face-to-face, Distance learning, etc.	Face to face		
USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY Use of ICT in teaching, laboratory education, communication with students	 Use of ICT (powerpoint) in teaching Use of ICT in Student Communication (Learning Support through the e-class platform) 		
TEACHING METHODS	Activity	Semester workload	
The manner and methods of teaching are described in detail.	Lectures Study and analysis of bibliography	26 26	
Lasturas cominava laboratore practico	Team Project	20	
Lectures, seminars, laboratory practice, fieldwork, study and analysis of bibliography, tutorials, placements, clinical practice, art	Individual essay preparation	20	
workshop, interactive teaching, educational visits, project, essay writing, artistic creativity, etc.	Private study time of the students for the lab preparation and final examination	8	
The student's study hours for each learning activity are given as well as the hours of non-directed study according to the principles of the ECTS	Course total	100	
STUDENT PERFORMANCE EVALUATION	Greek language is used. For foreign students (e.g. Erasmus students) it can be done in English		
Description of the evaluation procedure	1. Written final examination (A) 2. Individual essay (B) 3. Team project (C)		
Language of evaluation, methods of evaluation, summative or conclusive, multiple	Each case is graded on a scale of 0-10		
choice questionnaires, short-answer questions, open-ended questions, problem solving, written work, essay/report, oral examination, public presentation, laboratory work, clinical	Final grade (FG): FG = 0.5A + 0.3B + 0.2C		
examination of patient, art interpretation, other	Minimum passing grade: 5	(Grade: 0-10)	
Specifically-defined evaluation criteria are given, and if and where they are accessible to students.
